

Historical Budget Data

This appendix provides historical data for revenues, outlays, and the deficit or surplus—in forms consistent with the projections in Chapters 1, 3, and 4—for fiscal years 1962 to 2006. The data are shown in both nominal dollars and as a percentage of gross domestic product (GDP). Data for 2006 come from the Congressional Budget Office and the Office of Management and Budget. Some of the numbers have been revised since the last time these tables were published, in January 2006.

Federal revenues, outlays, the deficit or surplus, and debt held by the public are shown in Tables E-1 and E-2. Revenues, outlays, and the deficit or surplus have both on-budget and off-budget components. Social Security's receipts and outlays were placed off-budget by the Balanced Budget and Emergency Deficit Control Act of 1985. For the sake of consistency, the tables show the budgetary components of Social Security as off-budget prior to that year. The Postal Service was moved off-budget by the Omnibus Reconciliation Act of 1989.

The major sources of federal revenues (including off-budget revenues) are presented in Tables E-3 and E-4. Social insurance taxes include payments by both employers and employees for Social Security, Medicare, Railroad Retirement, and unemployment insurance, as well as pension contributions by federal workers. Excise taxes are levied on certain products and services, such as gasoline, alcoholic beverages, and air travel. Estate and gift taxes are levied on assets when they are transferred. Miscellaneous receipts consist of earnings of the Federal Reserve System and income from numerous fees and charges.

Total outlays for major categories of spending appear in Tables E-5 and E-6. (Those totals include both on- and off-budget outlays.) Spending controlled by the appropriation process is classified as discretionary. Spending governed by permanent laws, such as those that set eligibility requirements for certain programs, is considered manda-

tory. Offsetting receipts include the government's contributions to retirement programs for its employees, fees, charges (such as Medicare premiums), and receipts from the use of federally controlled land and offshore territory. Net interest (function 900 of the budget) comprises the interest paid by the government on federal debt offset by its interest income.

Tables E-7 and E-8 divide discretionary spending into its defense, international, and domestic components. Tables E-9 and E-10 classify mandatory spending by the three major entitlement programs—Social Security, Medicare, and Medicaid—and by other categories of mandatory spending. Income-security programs provide benefits to recipients with limited income and assets; those programs include unemployment compensation, Supplemental Security Income, and Food Stamps. Other federal retirement and disability programs provide benefits to federal civilian employees, members of the military, and veterans. The category of other mandatory programs includes the activities of the Commodity Credit Corporation, Tricare For Life (which provides health care benefits to retirees of the uniformed services who are eligible for Medicare), the subsidy costs of federal student loan programs, the Universal Service Fund (which reduces the cost of telecommunications services for selected areas and individuals), the State Children's Health Insurance Program, and the Social Services Block Grant program.

The remaining tables, E-11 through E-13, show estimates of the standardized-budget deficit or surplus and its outlay and revenue components. The standardized-budget deficit or surplus attempts to filter out the effects that cyclical fluctuations in output and unemployment have on revenues and outlays; it also incorporates other adjustments. The change in that deficit or surplus is commonly used to measure the short-term impact of fiscal policy on total demand. Table E-11 also presents estimates of potential and actual GDP.

Table E-1.**Revenues, Outlays, Surpluses, Deficits, and Debt Held by the Public, 1962 to 2006**
