## Humor with a Point

### The Top 10 requirements for a successful Clinton Economy are:

- 10) Find enough people willing to [flush millions](#) into a "New Economy."
- 9) Obtain CEO's willing to risk prison over [hyping their stock](#) so substantial [capital gains tax revenues](#) will magically appear.
- 8) Convince people it is good to [pay high salaries](#) even though [there is no profit](#).
- 7) In spite of world dangers, [cut defense spending](#) and call it "Pay-Go."
- 6) Hope your timing is right to [leave office before the downturn](#).
- 5) Consider [loss carry-forwards](#) "a tax-break for the rich."
- 4) Make [politicians exempt](#) from prosecution for statements that will send a CEO to jail.
- 3) Support hundreds of [attorneys](#) for election to congress because there is less chance of discovery.
- 2) In the final days of the administration have the [CBO issue a 190 page budget projection](#) because the press will not read beyond the second sentence.
- 1) Hope [Sarbanes-Oxley](#) passes so there will be no auditors with available time to determine what happened.
